BEYOND MEAT

Issue Statement

Beyond Meat's focus on plant-based meat mimicry is too small of a part of the meat-alternative market, already constrained by meat-eating culture.

Situation Analysis

- Porter's 5 Forces
- SWOT

Analysis of Alternatives

- Status Quo
- In-Industry: Beyonder Meat
- Out-of-Industry: Beyond Fabric

Implementation Plan

- Research & Preparation
- Marketing & Initial Launch
- Commercialization & Scaling

Porter's Five Forces

Substitutability: Low

- Health, environment, and ethics while mimicking meat cannot be easily substituted.

Entry Threat: Low

- Requires scientific advancements + brand recognition.

Competition: High

- Morningstar holds ~80% of US meat-alternative market share.
- Only defensible with plant-based animal protein mimicry.

Buyer Power: Low

- Higher wealth → lower price sensitivity

Supplier Power: Moderate

- Important to retain scientists

How many people truly need plants that tastes and feels like meat?

SWOT Analysis

1. Strengths

- Brand identity
- Scientific Development

2. Weaknesses

- Market Size
- Consumer Behaviour

3. Opportunities

- International Market
- Younger Demographic

4. Threats

- Government Regulations
- Cultural Resistance

Decision Criteria

Issue Statement:
Beyond Meat's target market is too small for growth

Brand Authenticity

reduced ecological impact compared to the meat industry

Customer Growth

reach out to new segments to earn more loyal customers

Competitive Defensibility

able to maintain a competitive advantage

Existing Strength

leverage research and knowledge

Status Quo

Continue leveraging plant-based protein fiber technology supported by:

Research

Improve quality & cost

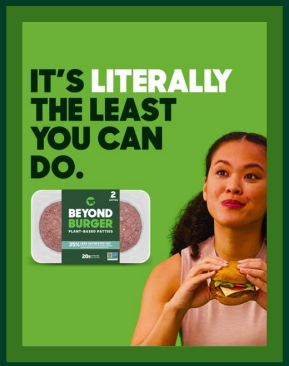

Outreach

International & B2B

Marketing

Target health & culture

Brand Authenticity:

Still recreates the meat-eating experience with health & environmentalism.

Customer Growth:

- Young & open-minded
- Wealthier
- International & B2B

Competitive Defensibility:

- Research barrier
- Marketing can be copied

Existing Strength:

Business as usual.

Beyonder Meat

Line of lab-grown meat modified for enhanced nutrition and protein levels:

- Intensive R&D and investment
- Targets demographics that want real meat

Brand Authenticity: Remains environmentally friendly

Customer Growth: Obtains customers from the traditional meat market

Competitive Defensibility: Entering untapped market but must compete with traditional meat

Existing Strength: Capitalizes on R&D and alternative to traditional meat message

Beyond Fabric

Beyond Fabrics is a clothing series that is made off of lab grown plants.

Brand Authenticity:

Still promotes eco-friendly and plant-centric business

Customer Growth:

Obtains customers from the traditional meat market

Competitive Defensibility:

- Clothing technology
- Limited Styles

Existing Strength:

Continue leveraging plant-to-animal protein technology

Recommendation

	Status Quo	Beyonder Meat	Beyond Fabric
Brand Authenticity	5	4	5
Customer Growth	3	5	4
Competitive Defensibility	2	4	3
Existing Strength	5	4	3
Total	**13**	**17**	**15**

Recommendation

Status Quo	Beyonder Meat	Beyond Fabrics
3.25	4.25	3.75

Beyonder Meat:
Directly combats issue of small target market

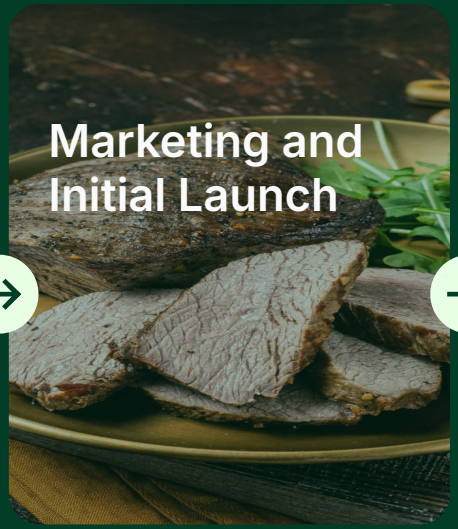

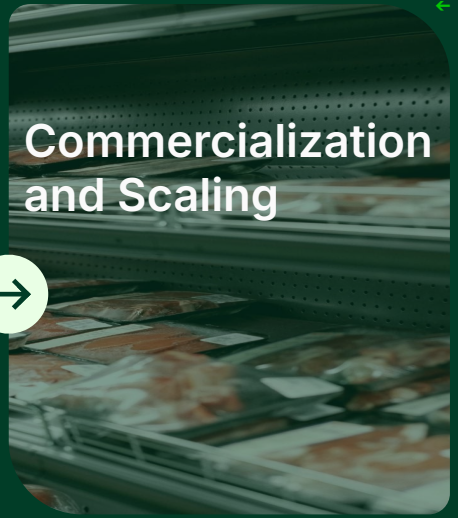

Issue Statement:
Beyond Meat's target market is too small for growth

Action Plan

Year 1 | Year 2 | Year 3 | Year 4

- Planning & Development
- Initial Launch
- Commercialization

Planning and Development

Research

- One year of R&D
- Partner with University of Missouri
- Tissue engineers and cellular biologists

Development

- Develop product variations
- Mass-production capacity
- **KPI**: Unit cost reduction milestone ($30/lb to $20/lb)

Legal

- Meet with FDA to ensure regulatory compliance
- File for patents
- **KPI**: Successfully obtain patent

Beta-Testing

- Perform a sentiment analysis
- Consumer testing and research
- **KPI**: 80% positive consumer feedback

Marketing & Initial Launch

Simplistic Branding

- Reinforce brand identity
- Comparative Advertising
- Purpose over cause
- **KPI**: media based reactions.

Evidence-Based Marketing

- Fitness, diet and health influencers
- Leverage research results
- Premium B2B
- **KPI**: material engagement rates

Data-Driven Pilot

- Compliment diet app
- Experiment different packages
- Identify customer demographic
- **KPI**: app usage, sales data

Issue Statement | Situation Analysis | Analysis of Alternatives | Implementation Plan

Commercialization and Scaling

Area

- North America
- Wealthier and health conscious cities
- Expand into other countries
- **KPI**: Growth in sales

Partnerships

- High quality retail stores
- Corporate cafes
- **KPI**: Revenue generation per partner

Reduce Prices

- Invest in R&D for lower prices
- End up with $15/lb by year 2
- **KPI**: Cost per lb$ over time

Thank you!

BEYOND MEAT®

Appendix: Action Plan

Markets

NA: San Francisco, LA, San Diego, NYC, Austin, Seattle, Vancouver, Toronto

International: Singapore, Netherlands, UK, UAE, South Korea

Stores

Erehwon, Trader Joe's, Whole Foods, Central Market

Mid to high end steakhouses and burger spots (Shake Shack, STK)

Product

Beef: Regular, Reduced Fat and Extra Protein, Vitamin D and Calcium, Creatine, Omega-3, Iron and Vitamin C

Burger patties, ground beef, chicken breast

Target Segments

Performance Athletes

Health Enthusiasts

Environmental Conscious Consumers

Appendix: Costs

R&D	$20 million
Tissue Engineers and Cellular Biologists	$2 million
Legal and patent filings	$3 million
Initial Research, Materials, and PPE	$15 million
Marketing campaign	$10 million

Commercialization	$85 million
Facility	$30 million
Bioreactors	$40 million
Other	$15 million
Monthly OPEX	$150,000

Total: $115 million + $150,000 monthly
